

Camp Tractor
A Project of \$30,000

While our camp gator may be the most visible member of our service fleet, our tractor arguably puts in the most work at camp. It is used nearly every day of the warm season, and frequently is pulled into service during the winter as well. It's been seen hauling a deck mower for mowing our acres of land, leveling roads, moving picnic tables, drilling holes using the camp's auger attachment, and so much more.

Because of this frequent and taxing usage, our tractor is also reaching the end of its service life as the main piece of heavy-duty machinery at camp. We are asking for your help in finding a suitable replacement, to last us at least another decade of service.

Supporting this project means that you are responsible for helping us purchase a new workhorse for the camp's service fleet, significantly improving our ability to do maintenance work and new projects. You will be recognized with your name and/or organization logo prominently featured on our camp website (<https://gamehavenbsa.org/camp>) for two years. You or your organization can also choose to be recognized with a large "provided by" decal affixed to the new vehicle in a prominent location, where it will be seen by campers and by our volunteer corps of community members in maintenance and outdoor recreation fields.
